

# COVID-19 Prevention Program (CPP) for Kerman Christian School

This CPP is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace.

**Date: 2/1/2021**

## Authority and Responsibility

**David Petropulos** has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

## Identification and Evaluation of COVID-19 Hazards

We will implement the following in our workplace:

- Conduct workplace-specific evaluations using the **Appendix A: Identification of COVID-19 Hazards** form.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections form** as needed to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

### Employee participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by: **We here at Kerman Christian are evaluating and following state guidelines daily.**

### Employee screening

We screen our employees by: **Taking daily temperatures, answering screening questions daily.**

## Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures will be documented on the **Appendix B: COVID-19 Inspections** form, and corrected in a timely manner based on the severity of the hazards, as follows:

**Being such a small school, we can identify, document, and correct any hazards very quickly.**

## Control of COVID-19 Hazards

### Physical Distancing

Where possible, we always ensure at least six feet of physical distancing in our workplace by:

- **When needed, workers can work remotely.**

- **Parents and visitors are not allowed on campus.**
- **All visuals and floor markings are in high traffic areas.**
- **All lunches and breaks are staggered.**
- **All lunch times and breaks are staggered for all employees.**

Individuals will be kept as far apart as possible when there are situations where six feet of physical distancing cannot be achieved.

### **Face Coverings**

We provide clean, undamaged face coverings and ensure they are properly worn by employees over the nose and mouth when indoors, and when outdoors and less than six feet away from another person, including non-employees, and where required by orders from the California Department of Public Health (CDPH) or local health department. **We have an adequate amount of PPE for all employees and students. Employees are encouraged to come talk to administration if another employee is not abiding by the social distancing and/or facial coverings guidelines.**

The following are exceptions to the use of face coverings in our workplace:

- When an employee is alone in a room.
- While eating and drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.
- Specific tasks that cannot feasibly be performed with a face covering, where employees will be kept at least six feet apart.

Any employee not wearing a face covering, face shield with a drape or other effective alternative, or respiratory protection, for any reason, shall be at least six feet apart from all other persons unless the unmasked employee is tested at least twice weekly for COVID-19.

### **Engineering controls**

We implement the following measures for situations where we cannot maintain at least six feet between individuals: **Face masks are required at all times.**

We maximize, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems by:

- **Our ventilating systems are maintained on a quarterly schedule**

### **Cleaning and disinfecting**

We implement the following cleaning and disinfection measures for frequently touched surfaces:

**[describe your workplace-specific measures, including:**

- **We ensure that our staff has adequate supplies at all times.**
- **We have developed a daily and/or hourly schedule to clean and maintain our classrooms and bathrooms.**

Should we have a COVID-19 case in our workplace, we will implement the following procedures: **We will disinfect all areas and quarantine the entire class for two weeks if we have a positive COVID test.**

### **Shared tools, equipment and personal protective equipment (PPE)**

PPE must not be shared, e.g., gloves, goggles and face shields.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible. Where there must be sharing, the items will be disinfected between uses by **All employees have their own supply of disinfectants and have been properly trained on how they are to be used.**

In order to implement effective hand sanitizing procedures, we:

- **Evaluating handwashing facilities.**
- **Determining the need for additional facilities.**
- **Encouraging and allowing time for employee handwashing.**
- **Providing employees with an effective hand sanitizer, and prohibit hand sanitizers that contain methanol (i.e. methyl alcohol).**
- **Encouraging employees to wash their hands for at least 20 seconds each time.**

#### **Personal protective equipment (PPE) used to control employees' exposure to COVID-19**

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.

When it comes to respiratory protection, we evaluate the need in accordance with CCR Title 8 section 5144 when the physical distancing requirements are not feasible or maintained. **reference section 3205(c)(E) for details on required respirator and eye protection use.**

We provide and ensure use of eye protection and respiratory protection in accordance with section 5144 when employees are exposed to procedures that may aerosolize potentially infectious material such as saliva or respiratory tract fluids. [Delete if not applicable to your workplace.]

#### **Investigating and Responding to COVID-19 Cases**

This will be accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

Employees who had potential COVID-19 exposure in our workplace will be:

- **We offer COVID-19 testing through our local Rite Aid at no cost during their working hours.**
- **The information on benefits described in Training and Instruction, and Exclusion of COVID-19 Cases, below, have been provided to them.**

#### **System for Communicating**

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- **Who employees should report COVID-19 symptoms and possible hazards to, and how Employees are to reach out to David Petropulos in case of a positive COVID-19 test.**
- **That employees can report symptoms and hazards without fear of reprisal.**
- **Our procedures or policies for accommodating employees with medical or other conditions that put them at increased risk of severe COVID-19 illness.**
- **Where testing is not required, how employees can access COVID-19 testing Employees can test at our local Rite Aid store at no cost whenever they feel the need.**
- **In the event we are required to provide testing because of a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test. A plan was put in place on September 1, 2020 on what we will do in case of an outbreak.**
- **Information about COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.**
- **We will communicate to our stakeholders via telephone.**

## Training and Instruction

We will provide effective training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards.
- Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
  - COVID-19 is an infectious disease that can be spread through the air.
  - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
  - An infectious person may have no symptoms.
- Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment - face coverings are intended to primarily protect other individuals from the wearer of the face covering.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.

**Appendix D: COVID-19 Training Roster** will be used to document this training.

## Exclusion of COVID-19 Cases

Where we have a COVID-19 case in our workplace, we will limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees with COVID-19 exposure from the workplace for 14 days after the last known COVID-19 exposure to a COVID-19 case.
- Continuing and maintaining an employee's earnings, seniority, and all other employee rights and benefits whenever we have demonstrated that the COVID-19 exposure is work related. This will be accomplished by **We provide employer-provided employee sick leave benefits, payments from public sources or other means of maintaining earnings, rights and benefits, where permitted by law and when not covered by workers' compensation.**
- Providing employees at the time of exclusion with information on available benefits.

## Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
- Report immediately to Cal/OSHA any COVID-19-related serious illnesses or death, as defined under CCR Title 8 section 330(h), of an employee occurring in our place of employment or in connection with any employment.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with CCR Title 8 section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-

19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

## Return-to-Work Criteria

- COVID-19 cases with COVID-19 symptoms will not return to work until all the following have occurred:
    - At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications.
    - COVID-19 symptoms have improved.
    - At least 10 days have passed since COVID-19 symptoms first appeared.
  - COVID-19 cases who tested positive but never developed COVID-19 symptoms will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
  - A negative COVID-19 test will not be required for an employee to return to work.
  - If an order to isolate or quarantine an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period will be 10 days from the time the order to isolate was effective, or 14 days from the time the order to quarantine was effective.
-

## Appendix B: COVID-19 Inspections

[This form is only intended to get you started. Review the information available at [www.dir.ca.gov/dosh/coronavirus/](http://www.dir.ca.gov/dosh/coronavirus/) for additional guidance on what to regularly inspect for, including issues that may be more pertinent to your particular type of workplace. You will need to modify form accordingly.]

Date: 02/01/2021

Name of person conducting the inspection: David Petropulos

Work location evaluated: Kerman Christian School

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
<b>Engineering</b>			
Barriers/partitions			
Ventilation (amount of fresh air and filtration maximized)			
Additional room air filtration			
<b>Administrative</b>			
Physical distancing			
Surface cleaning and disinfection (frequently enough and adequate supplies)			
Hand washing facilities (adequate numbers and supplies)			
Disinfecting and hand sanitizing solutions being used according to manufacturer instructions			
<b>PPE (not shared, available and being worn)</b>			
Face coverings (cleaned sufficiently often)			
Gloves			
Face shields/goggles			
Respiratory protection			

## Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or symptoms will be kept confidential. All COVID-19 testing or related medical services provided by us will be provided in a manner that ensures the confidentiality of employees, with the exception of unredacted information on COVID-19 cases that will be provided immediately upon request to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH), or as otherwise required by law.

All employees' medical records will also be kept confidential and not disclosed or reported without the employee's express written consent to any person within or outside the workplace, with the following exceptions: (1) Unredacted medical records provided to the local health department, CDPH, Cal/OSHA, NIOSH, or as otherwise required by law immediately upon request; and (2) Records that do not contain individually identifiable medical information or from which individually identifiable medical information has been removed.

**Date:** 02/01/2021

**Name of person conducting the investigation:** David Petropulos

<b>Employee (or non-employee*) name:</b>		<b>Occupation (if non-employee, why they were in the workplace):</b>	
<b>Location where employee worked (or non-employee was present in the workplace):</b>		<b>Date investigation was initiated:</b>	
<b>Was COVID-19 test offered?</b>		<b>Name(s) of staff involved in the investigation:</b>	
<b>Date and time the COVID-19 case was last present in the workplace:</b>		<b>Date of the positive or negative test and/or diagnosis:</b>	
<b>Date the case first had one or more COVID-19 symptoms:</b>		<b>Information received regarding COVID-19 test results and onset of symptoms (attach documentation):</b>	

**Results of the evaluation of the COVID-19 case and all locations at the workplace that may have been visited by the COVID-19 case during the high-risk exposure period, and who may have been exposed (attach additional information):**

Notice given (within one business day, in a way that does not reveal any personal identifying information of the COVID-19 case) of the potential COVID-19 exposure to:			
All employees who may have had COVID-19 exposure and their authorized representatives.	Date:		
	Names of employees that were notified:		
Independent contractors and other employers present at the workplace during the high-risk exposure period.	Date:		
	Names of individuals that were notified:		
What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?		What could be done to reduce exposure to COVID-19?	
Was local health department notified?		Date:	

\*Should an employer be made aware of a non-employee infection source COVID-19 status
